ABOUT ME

I am a full-stack web developer with a background in medical coding and customer service. I am an insatiable learner and can be a perfectionist [almost to a fault]. I work best in a team of like-minded individuals, and I look forward to building innovative new applications with a great team.

SKILLS

- **LANGUAGES:** Javascript, HTML5, CSS3, English
- **FRAMEWORKS:** Node.js, Express.js, React.js
- **DATABASES:** MongoDB SQL, Firebase
- **OTHER:** jQuery, Bootstrap, AJAX, JSON, Heroku, Command line, Git, GitHub, Auth0, OAuth, GIMP, Mocha, Chai, SASS
- **BUSINESS SKILLS**: Agile, Microsoft Office

DEVELOPMENT PROJECTS

Portfolio Site [https://samkeathley.github.io/PortfolioSite/#/]

This is my ongoing portfolio site to show off my abilities and skills that I've developed over my 13 week immersive bootcamp. I built this using React.js, React Router(3.0.5), and CSS.

divvy [https://github.com/SamKeathley/DivvyApp]

divvy (sic) is a savings web app that aims to educate and make saving money fun for young adults. This group project was built with React.js, React Router (3.0.5), Firebase, CSS, and used some APIs for logic. I worked on setting up and routing the major components and designing the pixel art.

Health Connect [https://github.com/SamKeathley/healthconnect]

Health Connect is a web app for school nurses, parents, and volunteer doctors to collaborate and provide students with fast and reliable care during their school day. This was a group project I worked on with a UX team and three other developers. It was built using Express, JS, MongoDB, Auth0. I worked on the database side and styling the user views.

WORK EXPERIENCE

CONTACTWORKS, L1 SUPPORT LEAD   May 2016 - Dec 2016
- Assumed team lead responsibilities which included: overseeing a small team of customer support reps, accelerated customer support workflow by designating assignments to team members, and trained members of other teams to learn established workflows.
- Troubleshoot hardware and software with clients.

NORTHWEST DIAGNOSTIC CLINIC, SCHEDULER   Jan 2016 - May 2016
- Scheduled patient appointments using multi-line phone system and scheduling software, according to doctors' schedules.

BRIGHTSTAR CARE, INTAKE COORDINATOR   Aug 2015 - Jan 2016
- Obtained and verified insurance information for home health services.
- On site hardware and software support.

EDUCATION

General Assembly, Austin
Web Development Immersive

Galveston College
Associate of Applied Science, Certification in Medical Billing and Coding
